IDENTIFIERS	*Washington

ABSTRACT

The Council on Higher Education was directed to review external educational options in the State of Washington, to prepare a report describing these options, and to develop guidelines for their establishment. This report provides a full inventory of external options in accordance with the directive. It was agreed that, in determining whether an educational activity would be considered "external," the focus would be on expanding educational access. Options designed to reach out to students who are unable to spend considerable amounts of time attending class on campus were felt to be clearly "external." In light of these criteria, the institutions were asked to examine their off-campus offerings. The document's maps and tables are intended to acquaint the reader with the nature and extent of off-campus offerings. (JMF)

APPENDIX A 114

OVERVIEW

Senate Floor Resolution 1974-218, adopted by Washington State Senate in February 1974, directed the Council on Higher Education to review external educational options; to prepare a report describing these options; and to develop guidelines for their establishment. The text of SFR 1974-218 is included as Appendix A. This report is an update of the January, 1975 report entitled "External Education Program Options Available in Washington" which was prepared in initial response to directives contained in the Senate resolution. It specifically addresses the Council resolve contained in the transmittal to the January report to further develop, complete and transmit a full inventory of external options.

The Council on Higher Education staff worked closely with institutional representatives to reach consensus on the most suitable and accurate description of external options. It was agreed that, in determining whether an educational activity would be considered "external," the focus would be on expanding educational access. Options designed to reach out to students who are unable to spend considerable amounts of time attending class on campus were felt to be clearly "external." It was therefore agreed that, in view of the focus described, courses and programs taught off-campus for the convenience of the institutions and those which take advantage of special off-campus facilities but serve students who would normally attend class on campus, would not be considered "external." While recognizing that it is sometimes difficult to determine the extent to which geographical access, affects a student's decision to enroll in an off-campus course, the institutions were asked to examine their off-campus offerings in light of these criteria.

For the 1974-75 survey, external options were divided into two categories: external programs and off-campus instructional sites. An external program was defined as a series of educational experiences possessing all of the following four characteristics:

1. Meets the needs of persons who are unable or unwilling to spend extensive time on campus;
2. Most learning occurs in locations geographically external to the major portion of the campus facilities;
3. Designed to meet one or more of the following objectives: degree, license, diploma, certification, or the attainment

of specified program goals; and

4. Integrated program of generally twelve quarter credit hours or more (or the equivalent in semester or clock hours).

Many institutions offer courses off-campus which are not specifically designed to meet the above four criteria for integrated off-campus programs. The category "off-campus instructional site" is intended to describe coordinated efforts in this area. It describes the efforts of a postsecondary institution to offer, on a continuing basis, courses designed to meet the educational needs of adults in a particular community. An off-campus instructional site may refer either to a single facility or to dispersed physical locations serving essentially the same population. It does, however, reflect an institutional commitment to the community.

Considerable efforts have been directed toward establishing appropriate and desirable procedures for ensuring cooperation and coordination among institutions. An outline of the procedures was presented in the January report. Since then, the reporting form used by the institutions in alerting the Council to new off-campus developments has been refined, as have the definitions of external programs and instructional sites. The Council, in a clearinghouse capacity, is attempting to ensure that information concerning new and existing external options is shared among the ~~external options~~ institutions; and, by January 1976, pending formal Council approval, the Council "will commence the regular review of new off-campus degree programs and off-campus counterparts to existing degree programs."*

The desirability of adopting coordinated approaches with regard to the use of facilities, faculty and support services is evident. In keeping with the intent of SFR 1974-218 and the Council's responsibility to study and make recommendations concerning adult education, continuing education, and public service programs; and to identify the most effective division of responsibility among institutions in meeting defined needs; the Council will ensure that, in the development of external options (1) cooperative approaches have been fully explored, (2) sufficient long-term demand exists to warrant the external program; and (3) the new program relates to the institution's role and mission. The long-range goal is the continued improvement of learning opportunities and services provided to all students unable to come to the campus.

* Recommendation N. 53, LONG RANGE PLAN FOR WASHINGTON POSTSECONDARY EDUCATION, Council on Higher Education, Olympia Washington, June 1975 (Draft).

Data provided by the institutions indicate that community colleges offer external programs in more than 20 cities, towns, or areas; the four-year institutions also offer external programs in more than 20 locations (see figure I). Courses are offered on a regular basis by four-year colleges and universities in more than 50 communities or areas (figure II), and by community colleges and vocational-technical institutes in more than 100 communities or areas (figure III).

The attached set of maps and tables are intended to acquaint the reader with the nature and extent of off-campus offerings. No value judgements are made at this time of the appropriateness of any off-campus activities. They will be made however, as part of the regular review process described above.

MAJOR OUTREACH PROGRAMS

The following external programs, which are either wholly or largely off-campus, merit special attention because they are so well established, because they serve a large number of students and, in the case of the community college programs, because they are offered in widely dispersed locations by so many institutions. They comprise a considerable portion of efforts to reach off-campus populations.

Adult Basic Education

Adult Basic Education refers to those courses particularly structured for adults who have not yet reached a level of eighth grade education. They are, for the most part, courses in reading, composition, literature, mathematics, basic science, and social studies. Some Adult Basic Education courses are conducted on campus and many are conducted off-campus. Courses are established where they are needed and where they can gather the most adults in one site.

In the Fall Quarter 1974-75, there were a total of 1198 students enrolled in such courses at off-campus locations, or 56 percent of total ABE instruction. All community college districts, with the exception of three, conducted Adult Basic Education courses. Adult Basic Education is financed through state general operating funds and by federal funds allocated to the Superintendent of Public Instruction Adult Education Office.

HIGH SCHOOL COMPLETION

Community college districts conduct courses aimed primarily at completion of a high school diploma or a GED certificate, mainly for adults. Some students under 18 years of age are admitted to these courses if they have previously received permission from the high school principal or superintendent to do so. In Fall quarter 1974-75, 51 percent of the instruction for high school completion courses took place off-campus.

High School Completion courses are often conducted in the same manner and are integrated with courses in Adult Basic Education. Adults who are interested in Adult Basic Education are more than often also interested in going straight through their educational program until they have a high school diploma or GED certificate, consequently, the sites where ABE and GED courses are offered and the instructors often overlap.

High school completion courses are financed entirely by general operating funds. Some community college districts issue high school diplomas; others work directly with local school districts to see that high school diplomas are issued through the local high schools.

Adult Farm Management

The Adult Farm Management Program extends over a three year period providing individuals with an opportunity to continue involvement for an indefinite duration through participation in seminar activities. The program is designed to assist the farm family in a study of its resources and to develop plans for the optimum use of such resources. Included is the training needed to develop an accurate set of farm records and the use of these records in making sound management decisions. Farmers and their wives are encouraged to participate in this program as a team. Each student is expected to participate in a program which includes both on-campus (lecture) and off-campus instruction on a 40%-60% split, respectively.

The Adult Farm Management Program is currently offered through Whatcom, Skagit Valley, Everett, Centralia, Yakima, Columbia Basin, Big Bend, Walla Walla, and Spokane Community Colleges. Funding for the Adult Farm Management Program comes from both participating farm families (approximately 15%) and from general operating funds (85%).

Parent Cooperative Pre-school

Participating parents, preferably both mother and father, enroll in this program which deals with the general role of parenting, including child development, consumer education, nutrition, safety, etc. The general objective is to improve home environment and quality of family living. In conjunction with the formal parent educational class taught by an instructor, those enrolled organize independent parent cooperatives to operate child development laboratories.

Children of participants are enrolled in the laboratory usually for half days, four days per week, with each parent participating at least one day per week. The cooperative hires a laboratory instructor to give continuity to the pre-school program. Program variations are developed to meet the needs of parents with infants and toddlers, pre-three year olds, and three to five year old children. The program is divided into one-third classroom/lecture instruction which occurs at locations most convenient to the parents; and two-thirds participatory learning, either on or off-campus.

The Pre-School may be one already established by the community college or one organized by the parents themselves. The Pre-School is operated and supported by parents; the teachers who manage the programs (instruction) are paid for by general operating funds.

Industrial First Aid

Industrial First Aid is designed to train the working force in the State of Washington with the skills necessary to treat the victims of illness or accident with emergency first aid. This basic first aid course is recognized by the Division of Industrial Safety and Health, Department of Labor and Industries, and requires instruction involving student participation in exercises involving the following:

1. Bleeding control and bandaging.
2. Practical methods of artificial respiration, including mouth-to-mouth and mouth-to-nose resuscitation.
3. Closed chest heart massage.
4. Poisons.
5. Shock, unconsciousness, stroke.
6. Burns, scalds.
7. Sunstroke, heat exhaustion.
8. Frostbite, freezing.
9. Strains, sprains, hernias.
10. Fractures, dislocations.
11. Proper transportation of injured.
12. Bites, stings.
13. Subjects covering specific health hazards likely to be encountered by co-workers of first aid students enrolled in the course.

Target population served by the community colleges are those persons employed as foremen, supervisors, or in direct charge of crews working in physically dispersed operations. (Two or more people are designated as a crew.) Those completing the prescribed course are issued a certificate valid for three years.

Almost 4,200 students were enrolled in off-campus Industrial First Aid programs in Fall, 1974 alone. Fifteen community college districts presently offer Industrial First Aid off-campus: Peninsula, Grays Harbor, Olympic, Skagit Valley, Seattle, Highline, Green River, Fort Steilacoom, Centralia-OVTI, Lower Columbia, Clark, Wenatchee Valley, Yakima Valley, Spokane, and Columbia Basin. Credit courses are funded by

college districts presently offer Industrial First Aid off-campus: Peninsula, Grays Harbor, Olympic, Skagit Valley, Seattle, Highline, Green River, Fort Steilacoom, Centralia-OVTI, Lower Columbia, Clark, Wenatchee Valley, Yakima Valley, Spokane, and Columbia Basin. Credit courses are funded by general operating funds. Noncredit courses are taught by volunteers designated by the Department of Labor and Industries.

Washington State University Cooperative Extension Service

The Cooperative Extension Service (CES) is one of three educational divisions of the Washington State University College of Agriculture. It has been an integral part of WSU since 1914, fulfilling the off-campus educational mission of the Land-Grant university. While the actual funding and educational policies are influenced by cooperative agreements between the university and the U.S. Department of Agriculture. Funding comes from several sources: federal 38%, state 38%, and county 24%. In addition; the county extension offices furnish office and instructional space, and secretarial help, free of charge.

The purpose of the Cooperative Extension Service is described as one of outreach. The CES has workers in every county in the state. Each staff member is skilled in his or her program area and functions to make current educational information available to anyone interested. The CES also serves as a channel through which citizen concerns and needs can be relayed back to Washington State University. Its structure allows it to develop educational programs on the basis of citizen needs, drawing upon the faculty of other departments within the university.

Cooperative Extension Service efforts are directed to assisting both the individual and the community. For example, an educational program which aims at integrating high value horticultural crops into the economy of central and eastern Washington aids both the individual producers and the economy of the state; and a land use planning effort educates citizens in ways which help them make socially-wise decisions. CES provides educational programs dealing with such public issues as land use, consumer education, housing, taxation, water development, recreation, and the problems of minority and low-income residents. The needs of urban as well as rural families receive attention.

External Programs

Off-Campus Programs, 1974-75

Institution: Central Washington State College

Reporting officer: Donald M. Schliesman; Dean Undergraduate Studies

Off-campus location	Everett, Ft. Steilacoom and Wenatchee Valley Community Colleges; Ft. Lewis Army Educ.Center	Columbia Basin College Community Center Tri-Cities area
Description (1) Nature of courses offered or objective (2) Target population (3) How the need was determined	(1) Law and Justice--Extended Degree. Emphasis is on liberal arts drawing, in particular from sociology, psychology, political science and administration. (2) Designed to help train students for careers as police officers, probation, parole & corrections workers, paralegal assistants, and court administrators. (3) Student inquiries, together with informal surveys thru directors of community college criminal justice & police science programs. A study of employment needs was completed in late 1973.	(1) Early Childhood Education Major earns a student a K-3 teaching credential. Student earns 45 credits in specific requred courses and through additional elective course work. (2) Three target groups are identified; People who cannot come to CWSC during the regular academic year; teachers & classroom aides who wish to retool for ECE and persons who wish to earn a degree
Support personnel on location	One advisor always available at each location. Others travel to off-campus locations as needed	College-based support personnel travel to off-campus locations as needed.
Approximate number of FTE faculty teaching off-campus	3.0 Regular full-time FTE; .25 full-time overload; and 1.0 special part-time FTE	
When courses are offered	Day, evening, weekend Fall, winter, spring	Weekends Fall, winter, spring, summer. The student is requried to come to CWSC campus during the summer
Projected annual average headcount enrollment, 1974-75	130	40
Percentage of instruction that occurs, by course level and course type	55% at 300-level 45% at 400-level	300 and 400-level courses; in addition, student must meet degree requirements in the current CWSC listed Undergraduate Catalog.
Other institutions, government agencies, groups which co-sponsor instruction	Everett, Ft. Steilacoom, and Wenatchee Valley Community colleges; and Ft. Lewis	Columbia Basin College
Approx. percentage of funding, by source	100% General operating funds	100% General operating funds

Off-Campus Programs, 1974-75

Institution Central Washington State College — Reporting officer Donald M. Schliesman; Dean, Undergrad.Studies

Off-campus location	Federal Aeronautics Administration Bldg., Auburn,Wa. & neighboring community colleges	
Description (1) Nature of courses offered or objective (2) Target population (3) How the need was determined	(1) B.A. in Liberal Studies -- Extended Degree program. Upper division courses and sequences in the natural sciences & mathematics social and behavioral sciences, and in the arts and humanities. (2) Journeyman & supervisory air traffic controllers, airway facilities technicians, & flight standards specialists. (3) Request from FAA; need for increased accessibility, and a need to keep alive the notion of the liberally-educated adult.	
Support personnel on location	College-based support personnel travel to off-campus locations as needed.	
Approximate number of FTE faculty teaching off-campus	3.67 Regular full-time FTE	
When courses are offered	Day, evening, weekend Fall, winter, spring

Approx. percentage of funding, by source	100% Grants and contracts	100% general operating funds

APPENDIX A

SENATE FLOOR RESOLUTION 1974-218

By Senators Gordon Sandison, George Scott and Dan Marsh

WHEREAS, Many of the state's residents do not have access to postsecondary education because of geographical location, handicaps, and economic or social disadvantage; and

WHEREAS, Alternative methods of providing opportunities for postsecondary education to persons unable to attend classes on a traditional campus have been explored by a special commission appointed by the Council on Higher Education; and

WHEREAS, Several of the state's institutions of higher education are exploring optional offerings external to the campus; and

WHEREAS, Coordination of such programs is essential to conserve scarce resources;

NOW, THEREFORE, BE IT RESOLVED, That the Council on Higher Education conduct a thorough review of all existing extension and correspondence programs to determine whether they are appropriate to the role of each respective institution and to minimize duplication; and

BE IT FURTHER RESOLVED, That the Council on Higher Education review newly developed external courses, offerings, and programs; and

BE IT FURTHER RESOLVED, That the Council on Higher Education prepare guidelines and procedures for the adoption of such programs, giving specific attention to cooperative approaches among the institutions; and

BE IT FURTHER RESOLVED, That the Council on Higher Education submit a report to the Legislature by January, 1975, describing external options and a statewide approach to new offerings in this field.

Adopted February 12, 1974.
